"Sand" is the word for "Narrative".

Sard Exhibition showcases a powerful visual & written narrative of 9 diverse photo stories about today's Egypt and Africa as photographed and narrated by 9 photographers from Egypt.

Sard II is curated to tell a bigger story beyond the walls of the exhibition that anyone will pass by the walls can relate to directly or indirectly in many different contexts, it was a big necessity to represent Africa as Egypt's geo-social south as a reminder that despite the years of over looking and cultural separation we have many in common. And we can find ourselves in their stories.

Lasts till February 18, 2023

The aim of "GRAIN" is to capture the special beauty in shooting on film and why its not dead even after decades competing against digital photography, starts from the unique feeling with every image cultivated from the moment you choose the type of film to loading it into the camera and then playing with development techniques, and ends with heartwarming nostalgic feeling we all get when looking at analog photographs which is believed to be one of the main reasons why photographers keep shooting on film or going back to it over the last few years.
